

A**Enhanceosome model**

- Rigid motif grammar
- Deep sequence conservation
- Direct cooperativity
- Direct DNA binding

B**Billboard model**

- Flexible motif organization
- Fixed motif types and numbers
- Less sequence conservation
- Indirect cooperativity or additivity
- Direct DNA binding

C**TF collective model**

- Motifs not always present
- Flexible motif organization
- Less sequence conservation
- Indirect cooperativity or additivity
- Direct and indirect DNA binding
