

Co-author declaration for the following joint paper:

This declaration should describe the research contribution of the candidate, the main supervisor (where he/she is an associate author) and the other two most central authors (the corresponding author must be among them). If applicable, the contributions from other PhD candidates who have or intend to include the paper in a thesis should be described. Contributions from master students should be described.

Authors: *Ieva Rauluseviciute, Rafael Riudavets Puig, Romain Blanc-Mathieu, Jaime A., Castro-Mondragon, Katalin Ferenc, Vipin Kumar, Roza Berhanu Lemma, Jérémy Lucas, Jeanne Chèneby, Damir Baranasic, Aziz Khan, Oriol Fornes, Sveinung Gundersen, Morten Johansen, Eivind Hovig, Boris Lenhard, Albin Sandelin, Wyeth W. Wasserman, François Parcy, Anthony Mathelier*

Title: *JASPAR 2024: 20th anniversary of the open-access database of transcription factor binding profiles*

Journal: *Nucleic Acids Research*

Ieva Rauluseviciute's independent contribution:

Co-first author, PhD candidate

Experimental and computational TF-DNA interaction data mining from CIS-BP repository and literature. This data processing. Preparation of current JASPAR motif collections for revision. Manual curation of the motifs and their metadata: selecting good quality motifs, searching literature and databases for information and creating the tables with manual curation results. Revision of the existing motifs and their metadata. Processing of plant data sets and coordination of their curation with collaborators in France. Update and development of the motif discovery pipeline to obtain candidate motifs for manual curation: refactoring the pipeline to include processing of external motifs, incorporation of clustering of motifs. Development of the downstream processing pipeline to process curated motifs: integrating word cloud and familial binding profile computations, generating motifs in different formats and computing motif logos. Computation of word clouds, familial binding profiles, preparing curated motifs collections and logos. Development of motif trimming workflow. Update of the JASPAR website content by providing update summary plots. Computing the database update summary table. Writing the manuscript sections about database update, motif trimming, conclusions and perspectives. Preparing supplementary material. Revising the entire manuscript. Management of and overseeing the whole project.

Rafael Riudavets-Puig

Co-first author

Experimental and computational TF-DNA interaction data mining from GTRD repository and literature. This data processing. Manual curation of the motifs and their metadata, revision of the

existing motifs and their metadata. Update and development of the motif discovery pipeline to obtain candidate motifs for manual curation: increasing the efficiency. Development of the downstream processing pipeline to process curated motifs: building containers, integrating transcription factor flexible models computation, generation of browser tracks and computations of TFBSs. Computation of transcription factor flexible models, transcription factor binding sites, matrix clusters, genome browser tracks, and TFBS enrichment databases. Update of the JASPAR website. Writing the manuscript sections about tools,

Jaime A. Castro-Mondragon

Co-author

Contributing to manual curation of the motifs by revising their quality Development and update of matrix clustering software. Computation of matrix clusters and radial trees deployed in the website. Revising the manuscript.

Anthony Mathelier

Main supervisor, Corresponding author

Supervision and project management. Coordination with international collaborators. Writing the manuscript.

Has this paper been, or will this paper be part of another doctoral degree thesis?

Yes: ☒ No:

If yes, elaborate: this article was included in Rafael Riudavets-Puig's doctoral thesis, who is a co-first author of this publication, and will be included in Katalin Ferenc's doctoral thesis, who is a second co-author.

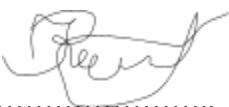

Contributions from master students: None

Do you verify that **Ieva Rauluseviciute** has contributed to this joint paper as described above?

Yes: ☒ No:

If no, specify:

Co-author's signatures:

Ieva Rauluseviciute

Rafael Riudavets-Puig

Jaime A. Castro-Mondragon

Anthony Mathelier
